

**! IMPORTANT**

If you choose to perform the installation yourself, it is absolutely vital that the Stealthbox® be properly mounted to the vehicle according to these instructions. Failure to mount the enclosure properly presents two problems:

- 1) The sub-bass performance will suffer due to the movement of the enclosure caused by the force exerted by the woofer(s).
- 2) A loose enclosure presents a serious safety hazard in the event of a collision or sudden deceleration.

Stealthbox®

INSTALLATION GUIDE
for the

SB-D-5GRAMCCF/12TW3**SKU# 94669****2019-Up Dodge Ram 1500 Crew Cab****Enclosure Type:** Sealed**Driver Type:** 12TW3-D8**Nominal Impedance:** 2 ohms**Continuous Power Handling:** 800 watts (RMS method)

*Thank you for choosing a JL Audio Stealthbox® for your automotive sound system.
With proper installation, your new vehicle-specific enclosed subwoofer system
will deliver years of listening pleasure.*

*We strongly recommend that you have your new Stealthbox® installed by your
authorized JL Audio dealer. The installation professionals employed by your
dealer have the necessary tools and experience to disassemble and reassemble
your vehicle properly. If you prefer to perform your own installation, please read
this installation guide completely before beginning the process.*

INCLUDED HARDWARE

BOM ID	Qty	SKU	Description
1	1	154040	Bracket
2	4	151096	3/8" Flat Washer
3	4	151081	3/8" Split Lock Washer
4	4	151079	3/8 - 16 x 1-1/4" Hex Head Bolt

POWER RECOMMENDATION

JL Audio recommends high quality amplifiers such as the JL Audio XD600/1v2. The diagram below shows the recommended crossover settings for the XD600/1v2. For a detailed description of the amplifier settings, consult the owner's manual for the amplifier. If another amplifier is being used, please reference this illustration and use similar settings on that amplifier.

CONNECTIONS

Using quality power, signal, and speaker wire is essential in ensuring the performance of your Stealthbox®. JL Audio recommends using a 4 AWG power kit such as the XD-PCS4-1B for your Stealthbox® amplifier. Other kits are available should you be using more than one amplifier. Signal wire such as the JL Audio Premium Audio Interconnect Cables should be used to provide signal for both channels of the amplifier. JL Audio recommends using 12 AWG speaker wire for subwoofers such as our XC-BCS12-25.

STEP 1
Empty the rear seat area.

STEP 2
Fold the seat bottoms up.

STEP 3
Locate the two inner seat bracket bolts.

STEP 4
Using an E12 socket and wrench, remove the two inner seat bracket bolts.

STEP 5
Place the enclosure on a flat surface with the woofers facing upward. Align the four slots in the Bracket with the threaded inserts on the back of the enclosure, as shown.

Slide a 3/8" Split Lock Washer and a 3/8" Flat Washer over each of two 3/8 - 16 x 1-1/4" Hex Head Bolts, pass an assembly through each of slots in the Bracket, into the threaded inserts, and hand tighten.

STEP 6
Place the Stealthbox® into the vehicle. Center the enclosure, and align the two upper slots in the Bracket with the factory inner seat bracket bolt holes.

STEP 7
While holding the Bracket in its position, carefully lift the enclosure, then fully tighten the four 3/8 - 16 x 1-1/4" Hex Head Bolts.

STEP 8
Connect speaker cable to the terminal cup on the back of the enclosure, and lower the enclosure back into position. Reinstall the two factory inner seat bracket bolts, and fully tighten.

Route the speaker cable as necessary.

**STEP 9**

Fold the seat bottoms back down.

CONGRATULATIONS!

You have completed the installation for this model! Enjoy your new Stealthbox®!

**MID/HIGH FREQUENCY DRIVER FITMENT**

A variety of JL Audio coaxial and component systems will fit in the factory speaker locations of your vehicle.

Location / OEM Speaker Size	Suggested JL Audio Speaker Models	
	Coaxial Models	Component Models
