

Stealthbox®

INSTALLATION GUIDE
for the

SB-T-TUNDB3/10TW3

SKU# 94592 - 94594

2007 - Up Toyota Tundra Double Cab

Enclosure Type: Sealed

Driver Type: 10TW3-D8

Nominal Impedance: 2 ohms

Continuous Power Handling: 800 watts (RMS method)

SB-T-TUNDB3/10TW3 INSTR_SKU# 011373

! IMPORTANT

If you choose to perform the installation yourself, it is absolutely vital that the Stealthbox® be properly mounted to the vehicle according to these instructions. Failure to mount the enclosure properly presents two problems:

- 1) The sub-bass performance will suffer due to the movement of the enclosure caused by the force exerted by the woofer(s).
- 2) A loose enclosure presents a serious safety hazard in the event of a collision or sudden deceleration.

INSTALLATION
DIFFICULTY:

1 OUT OF 5

ESTIMATED TIME:
1/2 HOUR

Thank you for choosing a JL Audio Stealthbox® for your automotive sound system. With proper installation, your new vehicle-specific enclosed subwoofer system will deliver years of listening pleasure.

We strongly recommend that you have your new Stealthbox® installed by your authorized JL Audio dealer. The installation professionals employed by your dealer have the necessary tools and experience to disassemble and reassemble your vehicle properly. If you prefer to perform your own installation, please read this installation guide completely before beginning the process.

INCLUDED HARDWARE

POWER RECOMMENDATION

JL Audio recommends high quality amplifiers such as the JL Audio HD750/1. The diagram below shows the recommended crossover settings for the HD750/1. For a detailed description of the amplifier settings, consult the owner's manual for the amplifier. If another amplifier is being used, please reference this illustration and use similar settings on that amplifier.

CONNECTIONS

Using quality power, signal, and speaker wire is essential in ensuring the performance of your Stealthbox®. JL Audio recommends using a 4 AWG power kit such as the XD-PCS4-1B for your Stealthbox® amplifier. Other kits are available should you be using more than one amplifier. Signal wire such as the JL Audio Premium Audio Interconnect Cables should be used to provide signal for both channels of the amplifier. JL Audio recommends using 12AWG speaker wire for subwoofers such as our XC-BCS12-25.

STEP 1

Empty out the rear seat area and fold up the rear seats.

STEP 2

Remove the factory bolt at the base of the driver's side seat bracket.

STEP 3

Remove the driver's side seat belt bolt.

STEP 4

Place the Stealthbox® into position. Secure a Bracket to the threaded insert on the driver's side of the enclosure using a 3/8 - 16 x 1-1/4" Hex Bolt, a 3/8" Lock Washer, and a 3/8" Flat Washer as illustrated on **Page 2**.

Align the hole in the Bracket with the factory bolt hole as shown.

STEP 5

Thread the factory bolt through the hole in the Bracket and back into the factory hole.

STEP 6

Secure a Bracket to the threaded insert on the passenger side of the enclosure using a 3/8 - 16 x 1-1/4" Hex Bolt, a 3/8" Lock Washer, and a 3/8" Flat Washer as illustrated on **Page 2**.

Align the hole in the Bracket with the factory bolt hole as shown.

STEP 7

Thread the factory bolt through the hole in the Bracket and back into the factory hole.

Tighten all hardware.

STEP 8

Connect speaker cable to the terminal cup on the enclosure and route as necessary. Fold the rear seats back down.

CONGRATULATIONS!

You have completed the installation for this model! Enjoy your new Stealthbox®!
