IMPORTANT SAFETY WARNING

PROLONGED CONTINUOUS OPERATION OF AN AMPLIFIER, SPEAKER, OR SUBWOOFER IN A DISTORTED, CLIPPED OR OVER-POWERED MANNER CAN CAUSE YOUR AUDIO SYSTEM TO OVERHEAT, POSSIBLY CATCHING FIRE AND RESULTING IN SERIOUS DAMAGE TO YOUR COMPONENTS AND/OR VEHICLE. AMPLIFIERS REQUIRE UP TO 4 INCHES (10CM) OPEN VENTILATION. SUBWOOFERS SHOULD BE MOUNTED WITH AT LEAST 1 INCH (2.5CM) CLEARANCE BETWEEN THE FRONT OF THE SPEAKER AND ANY SURFACE. KICKER PRODUCTS ARE CAPABLE OF PRODUCING SOUND LEVELS THAT CAN PERMANENTLY DAMAGE YOUR HEARING! TURNING UP A SYSTEM TO A LEVEL THAT HAS AUDIBLE DISTORTION IS MORE DAMAGING TO YOUR EARS THAN LISTENING TO AN UNDISTORTED SYSTEM AT THE SAME VOLUME LEVEL. THE THRESHOLD OF PAIN IS ALWAYS AN INDICATOR THAT THE SOUND LEVEL IS TOO LOUD AND MAY PERMANENTLY DAMAGE YOUR HEARING. PLEASE USE COMMON SENSE WHEN CONTROLLING VOLUME.

The KICKER Competition GOLD-series subwoofers celebrate the history and innovation of KICKER subs, combining the latest engineering upgrades with the toughness and low-end frequency response that are KICKER hallmarks. The Gold-Series introduce the latest KICKER innovation of Forced-Air Cooling, which uses the excursion of the woofer to force out hot air while drawing in cool air. This results in a 20% reduction in heat, increasing the already industry-leading reliability of our subs. The massive power-handling and motor, double-stitched surround and other features you've come to expect are also present. Whether upgrading an existing audio system or decking out a new one, these subwoofers are the foundation for your music.

Note: All specifications and performance figures are subject to change. Please visit **www.kicker.com** for the most current information. To get the best performance from your new KICKER speakers, we recommend using genuine KICKER accessories and wiring. Please allow two weeks of break-in time for the speakers to reach optimum performance.

Pro Tip: You're a KICKER amplifier and a few cables away from a full system upgrade that will dominate any factory system! KICKER line of amplifiers make it easy to upgrade to solid bass with your existing or stock source unit. Also, ask your dealer about KICKER Speaker upgrades.

Installation

Wiring Configuration

GOLD-Series subwoofers are made with dual 4Ω voice coils. Both coils must be connected to a source of amplification. They will provide a 2Ω load wired in parallel or 8Ω load wired in series. **Make sure your source unit or amplifier is rated at the correct ohm load for operation.**

The speaker wire should be kept away from sharp edges and avoid the possibility of getting pinched by the trunk. If a factory hole and grommet do not exist or are inaccessible, you must drill a hole through which to run the wire. Be careful not to drill into other wiring or existing mechanisms. Any time a wire is run through a hole, it is necessary to insert a rubber or plastic grommet to protect the wire from damage.

Box Building Notes

Use 3/4" (1.9cm) or thicker MDF (medium density fiberboard) and seal the joints with silicone. Use the "template" inside your GOLD subwoofer's shipping carton to mark the mounting hole, then cut directly on the line. These designs need internal bracing. Add triangular bracing between each of the larger unsupported panels.

All the cubic feet (L) measurements in this manual include the displacement of the woofer. For the vented enclosures the displacement of the port must be calculated and added to the internal volume of the final design. Use the outer dimensions of the port and multiply "X x Y x Z", convert to cubic feet, for example the GOLD12 Vented Minimum design's external port dimensions are, using 3/4" (1.9cm) MDF:

$$(12.5" + 1.5" \text{ total MDF wall thickness}) \times (2.5" + 1.5" \text{ total MDF wall thickness}) \times (20") \times (1 \text{ ft}^3 / 1728 \text{ in}^3) = .65 \text{ ft}^3$$

Then, add this number to the internal volume of the enclosure. $1.75 \text{ ft}^3 + .65 \text{ ft}^3 = 2.4 \text{ ft}^3$

Due to the necessary length of these ports, you may want to fold the port along the bottom and back walls. It will be impractical to use round ports for these designs.

Do not install a port opening against a solid surface, such as an internal brace, back-panel or trunk wall, seat or interior panel of your vehicle. The port opening must remain unobstructed. Use the smallest dimension of the rectangular port as the minimum amount of space between the port opening and any solid surface to insure unrestricted airflow.

You can loosely fill your enclosure with poly-fil stuffing. Ported designs will require covering the end of the port (located inside the box) with grill cloth, chicken wire, or expanded metal to prevent the poly-fil from exiting the port. The use of poly-fil will slightly decrease efficiency, but will deepen and extend the low frequency output by making your subwoofer think it's in a bigger box.

Add triangular bracing between each of the larger unsupported panels.

GOLD12, GOLD15: D = 3" x 3" (8cm x 8cm)

GOLD10: D = 2" x 2" (5cm x 5cm)

Sealed Enclosures

These sealed enclosure designs give the smoothest response with increased energy at the lowest frequencies, 20 to 30Hz. These designs deliver massive amounts of highly-accurate bass and can be driven with punishing levels of amplifier power.

The GOLD-Series high performance suspension system can operate in a larger sealed enclosure. This maximum enclosure volume application is ideal for SQ (ultra sound quality) installations. The Maximum enclosure generates a very flat response curve and superbly extends the sub-bass response.

Minimum Sealed

Model	Volume ft ³ (L)	Power Handling
GOLD10	.8 (22.7)	400W RMS
GOLD12	1 (28.3)	500W RMS
GOLD15	1.8 (51)	800W RMS

Maximum Sealed

Model	Volume ft ³ (L)	Power Handling
GOLD10	1.25 (35.4)	400W RMS
GOLD12	2 (56.64)	500W RMS
GOLD15	3 (85)	800W RMS

Panel Dimensions for Minimum Sealed Enclosures using 3/4” (1.9cm) thick MDF:

	<i>GOLD10</i>	<i>GOLD12</i>	<i>GOLD15</i>
Volume ft3 [L]	.8 [22.7]	1 [28.3]	1.8 [51]

Panel B in. [cm]	13.5X10.125 [34.3X25.7]	14.5X11 [36.8X27.9]	17.25X13.5 [43.8X34.3]
Panel C in. [cm]	12X10.125 [30.5X25.7]	13X11 [33X27.9]	15.75X13.5 [40X34.3]

GOLD-Series subwoofers perform well in any size sealed enclosure between the Minimum and Maximum volume recommendations. These systems will exhibit benefits of both designs. Overall, the system will sound more like the recommended enclosure design it is closest to in enclosure volume. These enclosure recommendations have been calculated with the airspace inside the enclosure and include the displacement of the woofer. All sealed-enclosure airspace should be filled to 50% loose poly-fil (polyester fiberfill) stuffing. Do not make the airspace greater than the SQ, maximum enclosure volume, recommendation.

Vented Enclosures

These boxes are the enclosure of choice if space is not a problem and you want to get the most output and low frequency extension from your GOLD subwoofer. GOLD subwoofers will handle massive amounts of power in any of the recommended enclosures, minimum or maximum. The smaller enclosures are best for use in limited-space applications. The larger recommended enclosures will yield slightly more bass at the lowest frequencies.

Vented Minimum	GOLD10	GOLD12	GOLD15
Box Volume, ft³ [L]	1.25 [35.4]	1.75 [49.6]	3 [85]
Port Opening, in. x in. [cm x cm]	2X10.5 [5.1X26.7]	2.5X12.5 [6.4X31.8]	2.75X15.5 [7X39.4]
Port Length, in. [cm]	20 [50.8]	20 [50.8]	25.75 [65.4]
Power Handling, RMS	400	500	800
Vented Maximum	GOLD10	GOLD12	GOLD15
Box Volume, ft³ [L]	1.75 [49.6]	2.25 [63.7]	5 [142]
Port Opening, in. x in. [cm x cm]	2.5X10.5 [6.4X26.7]	3X12.5 [7.6X31.8]	3X15.5 [7.6X39.4]
Port Length, in. [cm]	20 [50.8]	20.5 [52.1]	22 [55.9]
Power Handling, RMS	400	500	800

The Vented Minimum design increases bass efficiency and fits in many space-limited applications. Although it is the smallest recommended ported enclosure, the output from 30 to 80 Hz will be considerably higher than that of any sealed box. The Vented Maximum design has even more output in this frequency band. The Maximum is the largest and most efficient enclosure design.
