MAZATO

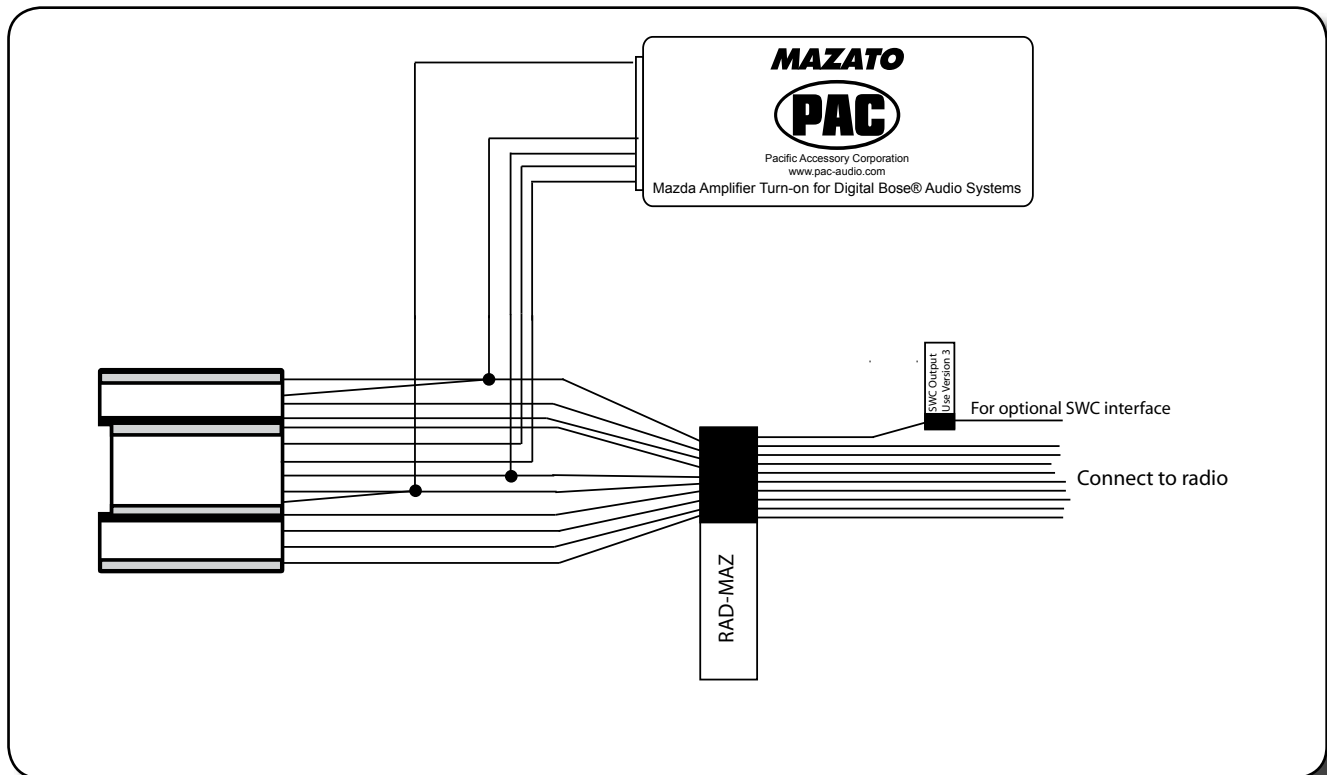

Mazda Amplifier Turn-on for Digital Bose® Audio Systems

The MAZATO is radio replacement interface that retains the use of the digital Bose® amplifiers found in Mazda vehicles. The MAZATO interface configures the Bose® amplifier for optimal sound quality, retaining the use of Centerpoint® signal processing.

Connections:

- **Yellow** - Connect to the radios +12v constant wire.
- **Red** - Connect to the radios +12v acc wire.
- **Black** - Connect to the radios chassis ground wire.
- **Orange** - Connect to the radios illumination wire.
- **White/Green** - Steering wheel control (SWC) output wire to be used with a SWI-ECL2, JACK, PS, or X (optional) for steering wheel control retention. Connect to the WHITE interface wire and program for Version 3.
- **Grey and Grey/Black** - Connect to the front right output channel of the radio.
- **White and White/Black** - Connect to the front left output channel of the radio.

When the OEM radio is removed the clock located on the center dash display will continue to work. However, the clock is set and adjusted through the OEM radio. If clock adjustments are needed the OEM radio will need to be reconnected to do so. There will not be any fading ability once the OEM radio is removed.

DISCLAIMER: Under no circumstances shall the manufacturer or the distributors of the MAZATO be held liable for consequential damages sustained in connection with the MAZATO. The manufacture and it's distributors will not, nor will they authorize any representative or any other individual to assume obligation or liability in relation to the MAZATO other than its replacement.
