Rockford Fosgate

EXCEEDS AMERICAN WIRE GAUGE STANDARDS

Rockford Fosgate accessories are designed and engineered in accordance with the AWG or American Wire Gauge specification - which is THE STANDARD method of denoting wire diameter. Don't be fooled by competitors that use cost-saving foreign or no specifications at all - using thick jackets to hide wires containing 25-50% less copper.

Instructions for graphical representation only

MORE COPPER... MORE POWER... BETTER SOUND!

OURS 4 GAUGE (AWG) WIRE

2X MORE Copper

735 copper strands

Their 4 Gauge wire has

60% LESS COPPER

and a fiber jacket to deliver MINIMAL power

1,862 copper strands

and a fiber jacket to deliver MAXIMUM power

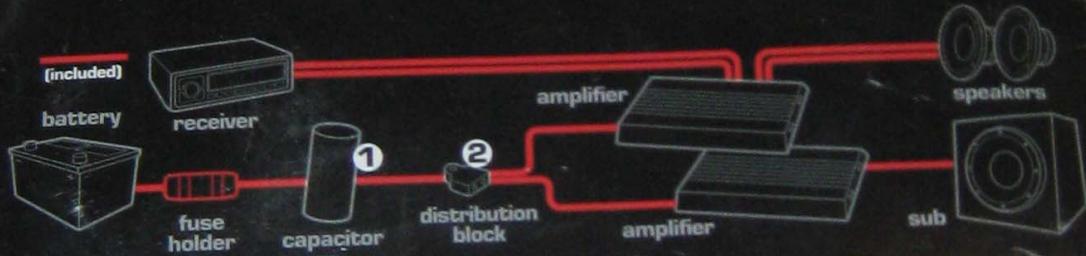

CLEANER SIGNAL... LESS INTERFERENCE... BETTER SOUND!

TWISTED PAIR

Helps reduce noise for

ENHANCED SOUND QUALITY!

Each channel is twisted, alternating the positive and negative conductors.

Don't Forget...

1 Capacitors - Keep your amps stable and your speakers from distorting. Delivers more BASS!

2 Distribution Blocks - Use on main power wires to distribute power to multiple components.
