

EXCEEDS AMERICAN WIRE GAUGE STANDARDS

Rockford Fosgate accessories are designed and engineered in accordance with the AWG or American Wire Gauge specification – which is **THE STANDARD** method of denoting wire diameter.

Don't be fooled by competitors that use cost-saving foreign or no specifications at all – using thick jackets to hide wires containing 25-50% less copper.

Illustrations for graphical representation only

MORE COPPER... MORE POWER... BETTER SOUND!

OURS 4 GAUGE (AWG) WIRE VS. **THEIRS** 4 GAUGE WIRE

Our true 4 Gauge (AWG) wire has 2X more copper and a jacket with no filler to deliver **MAXIMUM** power

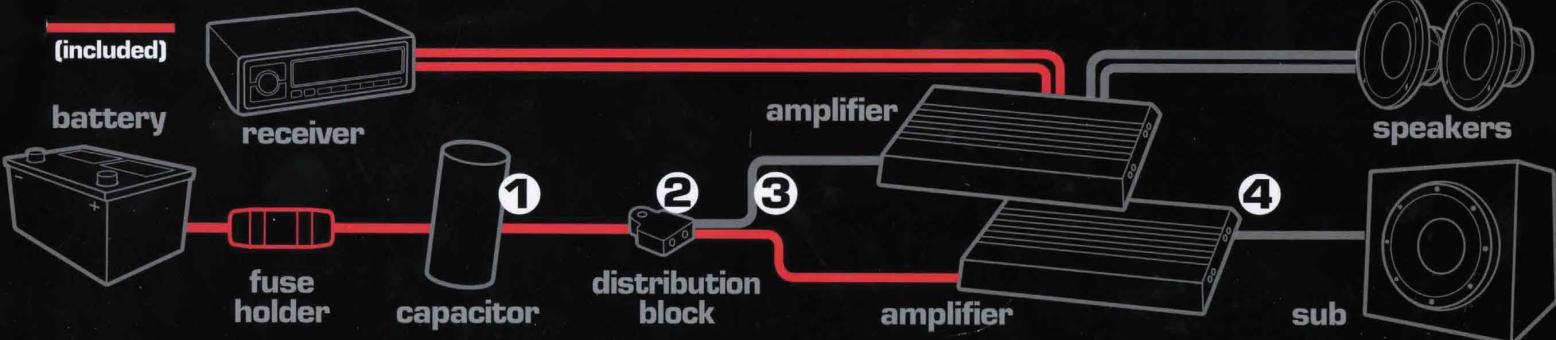

Their 4 Gauge wire has **60% LESS COPPER** and a filler jacket to deliver **MINIMAL** power

CLEANER SIGNAL... LESS INTERFERENCE... BETTER SOUND!

TWISTED PAIR

Helps **reduce** noise for **ENHANCED SOUND QUALITY!**

Each channel is twisted, alternating the positive and negative conductors.

Don't Forget...

1 **Capacitors** - Keep your amps stable and your speakers from distorting. Delivers more **BASS!**

2 **Distribution Blocks** - Use on main power wires to distribute power to multiple components.

3 **Speaker Wire** - High strand count copper wires ensure maximum output.

4 **Crimp Rings & Spades** - Use on power and speaker wires for secure connections.
