KIT PREPARATION

Attention! The factory panel will be permanently modified after following these steps.

1. Remove (4) Phillips screws securing the bottom of the vents, then unsnap and remove them.
2. Remove (7) Phillips screws securing the radio trim panel to the radio panel, then remove the trim panel. (Figure A)
3. Cut the opening as shown (front of dash panel shown) to allow room for the new radio trim panel. (Figure B)
4. Attach the radio trim panels to the radio panel, then secure with the (7) factory screws. (Figure C)

KIT ASSEMBLY

ISO DIN radio provision with pocket

1. Secure the *pocket* to the *radio brackets* using the (4) #8 x 3/8" *Phillips screws* supplied. (Figure A)
2. Remove the metal DIN sleeve and trim ring from the aftermarket radio.
3. Slide the radio into bracket/pocket assembly and secure with screws supplied with the radio. (Figure B)
4. Locate the factory wiring harness and antenna connector in the dash, and complete all necessary connections to the radio. Metra recommends using the proper mating adapter from Metra and/or AXXESS. Test the radio for proper operation.
5. Secure the completed assembly into the dash using the factory screws.
6. Reassemble the dash in reverse order of disassembly to complete the installation.
