Please read and understand these instructions completely before installation to avoid possible injury, or damage to the accessory or vehicle.

WARRANTY DISCLAIMER

SSV Works offers a warranty on all products manufactured by SSV Works, covering defects in material or workmanship. For Kicker products included with SSV Works systems, SSV Works handles all warranty claims directly, eliminating the need to contact Kicker separately. Warranty coverage is as follows:

- Enclosures/Panels (SSV Works): Limited Lifetime Warranty
- SSV Works Speakers and Subwoofers: Limited Lifetime Warranty
- Kicker Speakers: Limited 3-Year Warranty
- Kicker Subwoofers: Limited 1-Year Warranty
- SSV Works Amplifiers: Limited 2-Year Warranty
- Kicker Amplifiers: Limited 2-Year Warranty
- SWITCH Works Products: Limited 3-Year Warranty

This warranty does not cover damage caused by misuse, improper installation, or unauthorized modifications. For warranty claims, please contact SSV Works directly for assistance.

FORD® BRONCO RAPTOR
REAR SPEAKER PODS, DRIVER/PASSENGER

DISASSEMBLY

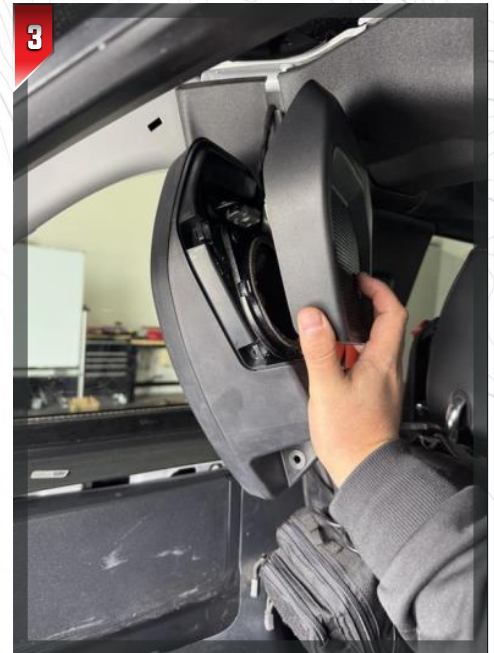

Remove the two T30 screws securing the top mounting bracket to the factory speaker pod, we recommend using an angle driver.

NOTE! These 2 screws will be re-used for the SSV Pods.

Remove the 3rd T30 screw located at the bottom of the speaker pod bolting the pod to the frame.

NOTE! This screw will be re-used for the SSV Pods.

Pop the cover off the factory pod with a panel popper.

INSTALLATION

Unplug the OEM audio plug behind the speaker grill and pull the speaker away. Repeat disassembly on the passenger side.

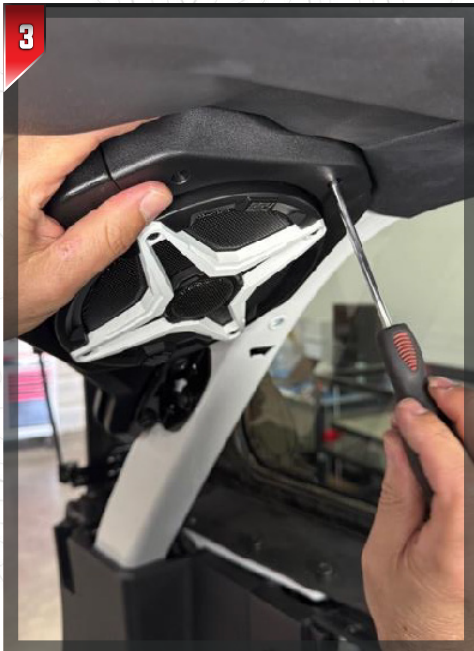

Using a T30 you can pre-thread the holes on the enclosure using the factory hardware from the stock speaker. This will make it easier for the install. Do this on each enclosure, 2 per side.

Hold the SSV pod up near its mounting location and connect the pod to the factory harness

FORD® BRONCO RAPTOR
REAR SPEAKER PODS, DRIVER/PASSENGER

Place the speaker pod harness cover onto the pod making sure the harness exits the cover through one of the two reliefs. Using the provided Phillips head screws, secure the cover into place.

Using the factory hardware, install the 2 T30 screws into the top of the enclosure.

Then secure the 1 T30 screw at the bottom of the enclosure.

With the screws secured your install is complete. Test the speakers to ensure they are working properly.
